## Pearson Edexcel International Advanced Level

**Tuesday 28 October 2025**

Afternoon (Time: 1 hour 30 minutes)

Paper  
reference

**WMA14/01**

### Mathematics

#### International Advanced Level

#### Pure Mathematics P4

#### You must have:

Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations.  
Calculators must not have the facility for symbolic algebra manipulation,  
differentiation and integration, or have retrievable mathematical formulae  
stored in them.**

#### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
  - *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

#### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets
  - *use this as a guide as to how much time to spend on each question.*

#### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

M:1/1/1/

**Pearson**

1. (a) Find the first 4 terms, in ascending powers of  $x$ , of the binomial expansion of

$$(2 + 5x)^{-2}$$

giving each term in simplest form.

(5)

- (b) State the range of values of  $x$  for which this expansion is valid.

(1)

- (c) Given that  $x$  is sufficiently small, find the values of  $a$ ,  $b$  and  $c$  such that

$$\left(\frac{4}{2 + 5x}\right)^2 \approx a + bx + cx^2$$

(1)

### **Question 1 continued**

(Total for Question 1 is 7 marks)

2.

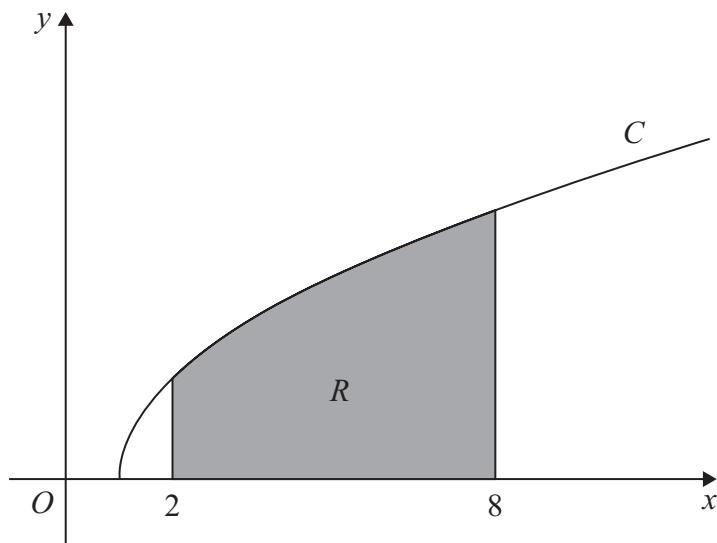

**Figure 1**

Figure 1 shows a sketch of the curve  $C$  with equation

$$y = \frac{5}{3}\sqrt{x - 1}$$

The region  $R$ , shown shaded in Figure 1, is bounded by  $C$ , the line with equation  $x = 2$ , the  $x$ -axis and the line with equation  $x = 8$ .

This region is then rotated through  $2\pi$  radians about the  $x$ -axis to form a solid.

Use algebraic integration to find the exact volume of this solid.

(5)

## **Question 2 continued**

(Total for Question 2 is 5 marks)

3. A curve has parametric equations

$$x = \frac{t+15}{t+4} \quad y = \frac{5}{t+2} \quad t \geq 0$$

- (a) Show that a Cartesian equation of the curve is  $y = g(x)$  where

$$g(x) = \frac{ax+b}{cx+d} \quad e < x \leq f$$

and  $a, b, c, d, e$  and  $f$  are constants to be found.

(5)

- (b) State the range of  $g$ .

(2)

**DO NOT WRITE IN THIS AREA**

**DO NOT WRITE IN THIS AREA**

**DO NOT WRITE IN THIS AREA**

### **Question 3 continued**

(Total for Question 3 is 7 marks)

4.

**In this question you must show all stages of your working.  
Solutions relying entirely on calculator technology are not acceptable.**

The curve  $C$  has equation

$$4x^2 + y^2 - 2xy = 24x$$

- (a) Find  $\frac{dy}{dx}$  giving your answer in simplest form in terms of  $x$  and  $y$ .

(5)

The point  $P$  lies on  $C$ .

Given that

- the gradient of  $C$  at  $P$  is 2
  - $P$  has coordinates  $(a, b)$  where  $a > 0$  and  $b > 0$

(b) find the value of  $a$  and the value of  $b$ .

(5)

**DO NOT WRITE IN THIS AREA**

### **Question 4 continued**

**DO NOT WRITE IN THIS AREA**

**DO NOT WRITE IN THIS AREA**

**DO NOT WRITE IN THIS AREA**

### **Question 4 continued**

(Total for Question 4 is 10 marks)

5. The line  $l_1$  has equation

$$\mathbf{r} = \begin{pmatrix} 2 \\ -1 \\ 3 \end{pmatrix} + \lambda \begin{pmatrix} 1 \\ 4 \\ 2 \end{pmatrix} \quad \text{where } \lambda \text{ is a scalar parameter}$$

- The line  $l_2$  has equation

$$\mathbf{r} = \begin{pmatrix} -1 \\ \beta \\ 6 \end{pmatrix} + \mu \begin{pmatrix} 2 \\ -1 \\ 7 \end{pmatrix} \quad \text{where } \beta \text{ is a constant and } \mu \text{ is a scalar parameter}$$

Given that  $l_1$  and  $l_2$  intersect at the point  $P$

- (i) find the value of  $\beta$   
(ii) find the coordinates of  $P$

(6)

## **Question 5 continued**

(Total for Question 5 is 6 marks)

6.

**In this question you must show all stages of your working.  
Solutions relying on calculator technology are not acceptable.**

Use the substitution  $u = 3 + \cos \theta$  to show that

$$\int_0^{\frac{\pi}{2}} \frac{\sin 2\theta}{\sqrt{3 + \cos \theta}} d\theta = a\sqrt{3} + b$$

where  $a$  and  $b$  are constants to be found.

(7)

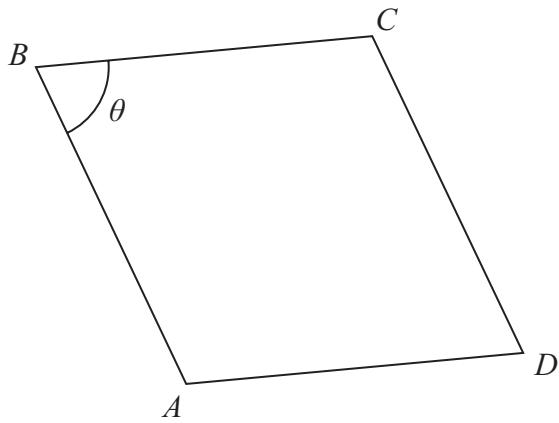

## **Question 6 continued**

**(Total for Question 6 is 7 marks)**

7.

**Figure 2**

**In this question you must show all stages of your working.  
Solutions relying entirely on calculator technology are not acceptable.**

Figure 2 shows a sketch of a parallelogram  $ABCD$ .

Given that

- $\vec{AB} = 6\mathbf{i} - 2\mathbf{j} + 3\mathbf{k}$
- $\vec{BC} = -4\mathbf{i} + 3\mathbf{j} - 5\mathbf{k}$
- angle  $ABC = \theta$ ,  $0 < \theta < 90^\circ$

(a) find the exact value of  $\cos \theta$ , giving your answer in simplest form.

(3)

(b) Show that the area of parallelogram  $ABCD$  is  $5\sqrt{k}$ , where  $k$  is an integer to be found.

(3)

## **Question 7 continued**

**(Total for Question 7 is 6 marks)**

8. A container initially contains 6 litres of water.

Water starts to flow into the container.

The rate at which the water flows into the container is modelled by the differential equation

$$\frac{dV}{dt} = 12te^{-t}$$

where  $V$  litres is the volume of water in the container,  $t$  minutes after water starts flowing into the container.

- (a) Solve the differential equation and use the initial condition to find an equation for  $V$  in terms of  $t$

(5)

Given that the capacity of the container is 20 litres,

- (b) determine, according to the model, whether or not the container will ever become full, giving a reason for your answer.

(1)

## **Question 8 continued**

**(Total for Question 8 is 6 marks)**

9.

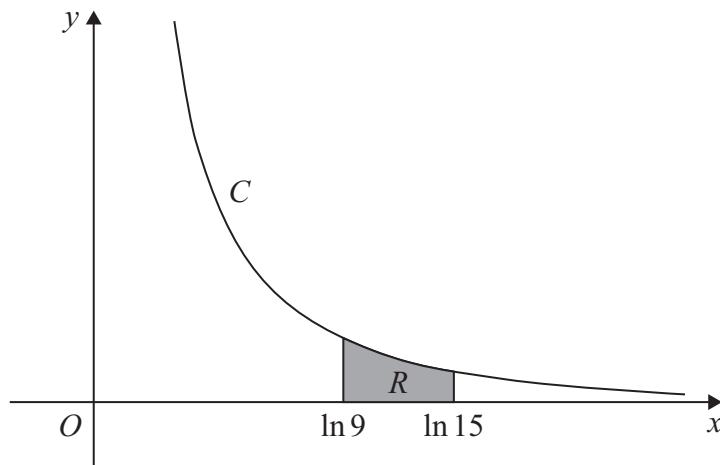

Figure 3

**In this question you must show all stages of your working.  
Solutions relying on calculator technology are not acceptable.**

Figure 3 shows a sketch of the curve  $C$  with parametric equations

$$x = \ln(2t + 5) \quad y = \frac{1}{t+1} \quad t > -1$$

A point  $P$  lies on  $C$ .

Given that the gradient of  $C$  at  $P$  is  $-4$

- (a) use calculus to find the exact  $y$  coordinate of  $P$ . (6)

The region  $R$ , shown shaded in Figure 3, is bounded by  $C$ , the line with equation  $x = \ln 9$ , the  $x$ -axis and the line with equation  $x = \ln 15$

- (b) (i) Show that the area of  $R$  is given by

$$\int_a^b \frac{k}{(t+1)(2t+5)} dt$$

where  $a$ ,  $b$  and  $k$  are constants to be found.

- (ii) Hence, using algebraic integration, find the exact area of  $R$ .

Write your answer in the form  $\frac{1}{3} \ln \alpha$ , where  $\alpha$  is a rational number.

**DO NOT WRITE IN THIS AREA**

### **Question 9 continued**

**(Total for Question 9 is 15 marks)**

10. (a) Statement X: "If  $x^2$  is an odd square number, then  $x$  is an odd number."

A student was asked to prove Statement X using proof by contradiction.

The student begins by writing the following.

Assume that  $x^2$  is an odd square number and  $x$  is an even number.

If  $x$  is an even number it can be expressed in the form  $x = 2m$   $m \in \mathbb{N}$

Complete the proof.

(2)

- (b) Use proof by contradiction to show that

“There are no integers  $a$  and  $b$  such that  $a^2 - 4b = 27$ ”

You may assume Statement X without further justification.
